ActCAD 2022 [March-2022]

You are buying a new car, and you want to make sure you don't get ripped off. You get in touch with your car dealership and ask for a one-on-one meeting with the sales manager. You don't want to make a financial commitment until you get the chance to talk to the sales manager. Is your car dealership bound to sell you a vehicle that will provide you with the best possible experience? If you have gotten in touch with your car dealership, chances are you are quite familiar with the website they are currently using. If the first thing you notice is their 'quick and easy' approach, chances are they are saving on hosting costs and a website is not your priority right now. Selling a car can be a tedious and time-consuming process, so if your website is not right there is a good chance you are missing out on a lot of potential customers. If your car dealership is not using a professional online solution for their website, they are probably missing out on a lot of opportunities to sell more cars. You may think that you don't have the time to create a website yourself, or that you don't have the necessary skills to create a professional website. So why do car dealers use website creators? Their budget probably doesn't allow them to purchase a full package of services, so the website creator is often the only way to get the website they need at an affordable price.
